

# INVESTMENT POLICY TO PREVENT GLOBAL WARMING

The health of the Earth is essential to not just business,  
but also species survival.

The Health, Safety and Welfare of all the stakeholders in our Company is the primary concern of the Board of Brandon Medical. The Company has consistently put sustainability projects first for capital investment and has now decided to develop and publish a "Green Plan" setting out how we will address sustainability and our road to net zero carbon, to prevent global warming through technological change and investment decisions.

- Any sustainability project will be given priority over any other capital investment with a similar Return on Investment.
- Any sustainability project with a reasonable chance of getting a Return on Investment of 4 years or less, should be brought to the attention of the Brandon Medical Board.
- A written decision on any such project is mandatory within 3 months of project submission.
- As a Board, we undertake to use our personal and corporate presence to influence policymakers to legislate the requirement for "Green Plans" for all businesses with more than 250 co-workers.
- Current or potential supplier input is welcomed, including their use of the global hotline where necessary.

The Board of Brandon Medical encourages employees and stakeholders to contact us by calling +44 133 277 7393 or by email on [enquiries@brandon-medical.com](mailto:enquiries@brandon-medical.com) to assist with the discreet implementation of this policy where necessary.
