EASTERN SEALS
GLOBAL SEALING PROVIDER

06 July 2021

AN INVESTMENT POLICY TO PREVENT GLOBAL WARMING

In order to facilitate our “Business Objectives”, it is Eastern Seal’s intention to implement, maintain and continually improve an Integrated Management System which meets the requirements of BS EN ISO 14001:2015.

The group has now decided to augment this by publishing a policy to prevent global warming through technological change and investment decisions by implementing and adhering to the following strategies.

- Any sustainability project will be given priority over any other capital investment with a similar return on investment.
- Any sustainability project brought to the attention of the Eastern Seals Board will be recorded and viewed reviewed and those with a return of 4 years or less will be prioritised.
- Decisions on such projects will be completed within 3 months of being logged
- The Directors undertake to use our personal and corporate presence to influence policy makers to legislate the requirement for such a policy for all businesses in the SME sector.
- Current or potential supplier input is welcomed.

The Board of Directors encourage employees and stakeholders to contact me directly on 01670 840 529 or by email at Diane.Reach@easternseals.co.uk to assist with the discreet implementation of this policy where necessary.

Yours sincerely

Diane Reach
